Recovery  
partition

Insufficient  
space  
warning

Destination:  
F drive

# Revised Configuration

The screenshot shows the 'Disk Backup' configuration window. The 'What to back up' section lists several partitions: 'Unnamed partition' (FAT 16, 0.1 GB of 0.1 GB used), 'RECOVERY' (NTFS, 0.2 GB of 0.7 GB used), 'OS (C:)' (NTFS, 206.8 GB of 465 GB used), 'Media Storage (E:)' (NTFS, 100.8 GB of 366.2 GB used), and 'Backup Storage (F:)' (NTFS, 42.2 GB of 99.5 GB used). The 'Destination' is set to 'E:\My backups' (NTFS, 265.36 GB of 366.2 GB free). The 'Backup name' is 'E6520\_103011'. The 'Back up now' button is highlighted with a red box and an arrow pointing to it from the annotation 'Click to start backup'. Another red box and arrow points from the annotation 'New destination: E drive' to the 'Destination' field. A third red box and arrow points from the annotation 'Backup name=computer model + date' to the 'Backup name' field.

**New destination: E drive**

**Backup name=computer model + date**

**Click to start backup**

# The Result

The screenshot displays the Acronis True Image Home interface. At the top, there are navigation buttons and a search bar. Below the Acronis logo, there is a section titled "Add backups" with three options: "Disk and partition backup" (Protect your computer from a disaster), "Nonstop Backup" (Protect partitions and files continuously), and "Online Backup" (Use online storage to keep your data safe). Below this, a "My backups" section lists two completed backups. The first backup, "E6520\_103011", has a total size of 172.38 GB and is located at E:\My backups\; it was updated today at 5:42 AM. The second backup, "E6520\_080711", has a total size of 38.15 GB and is located at F:\My backups\; it was updated on 8/7/2011. Each backup entry includes "Recover" and "Back up now" buttons, along with "Explore and recover" and "Operations" links. A green notification bar at the bottom of each entry states "The backup has successfully completed".

**NOTE**

The backup only took a few minutes.

However, the validation took over 4 hours

Backup name, file size, location

Backup Name	Total Size	Location	Updated	Schedule
E6520_103011	172.38 GB	E:\My backups\	Today at 5:42 AM	Off
E6520_080711	38.15 GB	F:\My backups\	8/7/2011	Off

# Tools and Utilities

The image shows a screenshot of the Acronis True Image Home software interface. The main window title is "Acronis True Image Home" and the address bar shows "Home > Tools and Utilities". The "Tools & Utilities" section is expanded, showing several categories of tools:

- Protection tools**
  - Acronis Startup Recovery Manager
  - Rescue Media Builder
  - Acronis Secure Zone
  - One-Click Backup
- Disk management**
  - Clone disk
  - Add new disk
- Security and privacy**
  - Acronis DriveCleanser
  - View current state of your disks
  - File Shredder
  - System Clean-up
- Backup conversion**
  - Convert Acronis backup to VHD
  - Convert Windows backup to VHD
- Backup settings**
  - Import backup settings
  - Export backup settings

Two red boxes highlight specific areas. The first box, titled "Tools & Utilities", encloses the "Protection tools" section. A red arrow points from this box to the "Protection tools" category in the main interface. The second box, titled "Rescue disk needed – called here Rescue Media, elsewhere in the program called bootable media", encloses the "Rescue Media Builder" option. A red arrow points from this box to the "Rescue Media Builder" option in the "Protection tools" list.

# Member Discount

Acronis True Image price for FRPCUG members is \$25 (50% discount).

Details on Members Only page of the FRPCUG website.
